Python, Udemy
present | Online
Pursuing

📁 PROJECTS

Road Safety using Smart Helmet
The Smart Helmet is a revolutionary safety device that enhances the protection of motorcycle riders by incorporating advanced features such as alcohol detection, wear detection, helmet-based ignition key, drowsiness detection, and accident detection.

My Virtual Assistant
I created a virtual assistant using Python and various Python modules.   A virtual assistant that can perform tasks, answer questions, and provide assistance to users. By leveraging Python's extensive libraries and modules, we build a versatile virtual assistant capable of performing a wide range of tasks.

🌐 LANGUAGES

English, Kannada.

👤 PROFILE

I am a dedicated and enthusiastic recent graduate with a engineering degree in the field of computer science. I bring a strong academic foundation, a passion for learning, and a proactive approach to acquiring new skills. With my strong work ethic and eagerness to contribute, I am eager to make a positive impact and grow professionally.

🧠 SKILLS

Python,C,HTML
